

Why Other Options Are NOT Really Options...

New Vehicles

- Lose \$2,000 - \$3,000 in value, right out of the showroom
- Depreciate by 35 - 50% in the first two years
- In only three years, an average new car loses 54% of its original purchase value
- Higher tax, insurance and licensing costs

Used Vehicles

- Lose \$1,000 - \$1,200 in value, when leaving the lot
- May have only a minimal warranty, if any
- Hidden problems may require expensive repairs

Junkyard Units

- Possible high mileage or poor maintenance history - a failure waiting to happen
- May have been pulled from a vehicle that was involved in an accident - unseen damage

Rebuilt/Overhauled Components

- Overhauls generally replace only severely defective parts
- Quality varies, widely, upon the builder
- Often come with a minimal warranty

Your Best Option:

Value

- Add peace-of-mind for years to come
- Save a small fortune over the purchase of a new or another used vehicle
- Add future resale value to your vehicle

JASPER's Experience

- Remanufacturing quality products since 1942
- One of the largest and most trusted remanufacturers of drivetrain products
- Over 25 acres of remanufacturing in four facilities
- Over 40 Nationwide Branch Locations and over 2000 Associate/Owners working for YOU!

Do You Like Your Vehicle?

Were You Planning on Trading Your Vehicle?

If you didn't intend to replace your vehicle before it quit, why would you now? Replacing a drivetrain component will cost considerably less than replacing the vehicle. Aren't you comfortable with your vehicle? After all, you know where all the buttons and knobs are located. Remember why you purchased your vehicle to begin with - you liked it!

Your Vehicle is Worth Keeping!

You can get thousands more miles for less by choosing a JASPER Remanufactured Engine or Transmission. Drivetrain components remanufactured by JASPER allow you to drive with confidence, without the hassle of monthly new car payments. Have you ever tried to sell or trade a vehicle with drivetrain problems? You will rarely get what the vehicle is truly worth. By purchasing a JASPER product, you are adding resale value, plus the warranty is transferable, with nationwide coverage.

"There's a high degree of responsibility and team commitment that comes with being an Associate/Owner. I feel an intense sense of pride after each engine is completed."

Junior T. - Engine Builder
Gas Engine Assembly POP 304

Are There Other Options? Well, Let's See...

- New Cars - nice, but will depreciate rapidly and require substantial monthly payments and high ownership costs
- Used Cars - not as costly as new, but may have hidden problems that will result in expensive repair bills
- Rebuilt Units - quality is inconsistent and usually carry a minimal warranty
- Junkyard Units - just as the name implies - junk! The purchase of a junkyard component may seem like a bargain, but it's a gamble. You never know if it's suffered abuse or damage, requiring its replacement and additional installation costs.
- Walking or Biking - while good for your physique, may cause missed appointments and tardiness...

We understand that making decisions involving personal finances can be tough, so if you need further assistance in your decision - visit our website, www.jasperengines.com, make your product selection, and try out our REPOWER CALCULATOR. You will find that replacing your failed drivetrain component with a high-quality JASPER product is your BEST Option!

It Makes Sense to Fix it Right the First Time

- Quality and reliability at a fraction of the cost of a new or newer used vehicle
- Significantly faster and more dependable than overhauling an engine, transmission or differential
- Less time without your vehicle and decreased rental vehicle costs
- 3 Year/100,000 Mile, Nationwide, Transferable Parts & Labor Warranty
- No monthly vehicle payment means more cash on hand for you and your family
- Recycling engines, transmissions and differentials benefits the environment

Choose JASPER with confidence! JASPER remanufactured Gas Engines, Transmissions and Differentials are backed by a Nationwide, Transferable, 3 Year/100,000 Mile Parts and Labor Warranty. A technical hotline with 24/7 emergency warranty information is available at 800-827-7455. For even greater "peace of mind", a Premium Service Plan that includes premium labor and fluids is available. Full warranty disclosure is available on our website, or upon request.

Specifications subject to change without notice.

"As a 100% Associate Owned Company, we Associates are continuously improving our processes and adding greater value to the high-quality products that we build."

Ron N. - Team Leader
Transmission Assembly POP 57-58

Quality is Built into Every Remanufactured Transmission

- Updated Procedures - remanufactured to correct problems in original manufacturer design, for an equal to, or better than new product
- New and Qualified Parts - all new and qualified parts are carefully inspected for exact tolerances to assure dependability
- Remanufactured Valve Body "The Brain" - carefully remanufactured to achieve the same shift quality and "feel" as new
- Dynamic Balancing - eliminating vibration of the torque converter can prevent future transmission damage
- Dynamometer Testing - simulates in-vehicle operation of automatic transmissions to assure trouble-free performance

Reliability is Built into Every Remanufactured Engine

- Updated Parts & Processes - remanufactured to meet or exceed original specifications by correcting OEM design flaws and improving reliability
- Thorough Cleaning - after core disassembly, all components undergo multiple cleaning processes to assure quality product remanufacturing and long engine life
- Precise Machining - boring, honing and resurfacing to exact clearances and specifications for optimal performance
- New and Qualified Parts - all new and qualified parts are carefully inspected for exact tolerances to assure dependability
- Live-run Testing - assures proper operation (compression, vacuum, oil pressure and black light leak testing)
